

For a child, surgery can be twice as scary. Fortunately, Children's Memorial has twice as many surgical specialists as any other Illinois hospital, which means double the experience and expertise. The first children's hospital in Illinois, established over 125 years ago, we have more than 1,100 highly skilled physicians focusing on more than 70 specialties. Heroic talents. Incomparable understanding. When combined, they go a long way toward making things less scary for your child, and for you.

**Surgery is even more intimidating to a child.**  
That's why our physicians are gifted with skills that go beyond.
