

More than 200,000 children in the United States are injured seriously enough on playgrounds every year to require a visit to the emergency room.*

Is your child's playground the safest it can be?

It's easy to find out.

The Injury Free Coalition for Kids of Chicago at Children's Memorial Hospital provides **free, onsite playground safety checks** to schools, park districts, preschools, and childcare centers. If your child's school or local park is in the process of building a new playground, consider utilizing us in the planning process.

To schedule a check today, or for more information, call 773.880.3993 or visit www.injuryfree.org/chicago
